About Computer Science & Engineering Department:

The department of Computer Science & Engineering at DVSIET established in the year 2007. The department is committed to improve the quality of education by enhancing the knowledge of students and staff. The department offers small class sizes in computer laboratory that provides an interactive approach to learning programming concepts. The department regularly organizes seminar, workshops & industry oriented talks by inviting technocrats, academicians & professionals from various institutions & industry. Emphasis is laid on both practical & theoretical training so as to expose the students to various areas of technology and its latest developments.

Objective:

Digital Image Processing (DIP) plays a significant role in modern engineering and information processing systems. Many of the techniques of DIP such as enhancement, filtering, morphological processing, compression, object recognition etc are playing a major role in image analysis and computer vision which attempt to extract meaningful information from digital images. This FDP aims at providing theoretical as well as practical aspects in the field of data structures & algorithms and Digital Image Processing.

Accommodation :

Accommodation may be arranged based on the request from participants.
