MARRIAGE HALL

With a change of social set up and owing to scarcity of common spaces, the Marriage Halls have become a social necessity wherein different strata of the society hold social gatherings/ functions. Not only the marriages of almost every strata of society is solemnized in these Marriage Halls but also other social, religious and other similar functions are performed in these places. Thus it has become a social necessity. A Marriage Hall has to be classified as a special category of building with ultra-modern facilities and will have-to make provision for all types of social and cultural activities.
