B. Arch.

(SEM. II) THEORY EXAMINATION, 2014-15 ARCHITECTURAL DESIGN - II

Time : 6 Hours]

[Total Marks : 100

- Notes: (1) Attempt all questions.
(2) Assume suitable data, wherever necessary.
(3) Medium of presentation is left to the candidate.
(4) Use a scale of 1:10 in Q. 1 and Q. 2.

- 1 Attempt any **two**. Design optimum utilization 20×2=40
spaces for activity to be performed as enumerated
below. Support your answer through plan and
sectional elevation :
- (a) Study Table
 - (b) Toilet for Single User
 - (c) Bar Counter
 - (d) Over Counter Kitchen Storage.

- 2 During the Tsunami 2004, one tourist ship sank in the bay of Bengal, few of its survivors got ashore to some lonely island. Now their first priority was to find a shelter for making themselves safe against the harsh weather conditions. But the only raw material available on the island which can be used is bamboo and Rope made from Coconut fiber. Making a thatched roof from the same fiber is also possible. You are required to design a shelter on a raised platform for an individual with the help of available material which fulfils the following functions :
- (a) Cooking
 - (b) Dining
 - (c) Sleeping
 - (d) Protection from animals and the weather.
- Support your answer through **plan, elevation** and **sectional elevation**.
