L/T/P – Lecture/Tutorial/Practical, CT/TA/PS- Class Test/Teachers Assessment/Practical Session, TE/PE- Term End/ Practical End
SEMESTER I
MANAGEMENT CONCEPTS AND ORGANISATIONAL BEHAVIOUR
Course Credit: 3 Contact Hours: 40

Course Objectives:

1. To provide basic understandings of management processes
2. To help the students understand the concepts of organizational behaviour
3. To apply the concepts of management and organizational behaviors in real world situations
4. Familiarizing the students with the contemporary issues in management.
5. Developing managerial and leadership skills among students

UNIT I (8 Lectures)
Fundamentals of Management: Management practices from past to present, Different levels of management, Managerial skills and Managerial Functions, Case Studies
Planning- Objective of planning, Planning process, Types of planning, Types of plans, Management by Objective, Decision-making- types, process & techniques, Case Studies

UNIT-II (8 Lectures)
Organising & Staffing- Types of organization, Organization structure and decentralization of authority, Meaning of staffing, Recruitment, selection & placement, Training & development.
Directing & Controlling- Principle of directing, Essence of coordination, Different control techniques, Management by exception. Case Studies

UNIT III(8 Lectures)
Fundamentals of individual behavior, Personality, types of personality, Personal effectiveness, meaning of Attitudes, Types, Components, attitude formation and attitude change. Meaning & Type of Group Behaviour, Interpersonal skills, Transactional Analysis, Johari Window

UNIT IV (8 Lectures)

UNIT V: (8 Lectures)
Leadership: What is leadership, types of leaders and leadership styles, traits and qualities of effective leader, trait theory, LSM – Leadership Situational Model, Team Building, Tuckman Model of Team Development. Organizational Change: Meaning of organizational change approaches to managing organizational change, creating a culture for change, implementing the change, Kurt Lewin Model of change. Case Studies

### Suggested Readings

4. Dr. Premvir Kapoor, Principles and Practices of Management, Khanna Publishing House, Delhi
9. Aswathappa K, —Organizational Behaviour (Text, Cases and Games), Himalaya Publication
10. Udai Pareek, —Organizational Behaviour, Oxford University Press
MANAGERIAL ECONOMICS

Course Credit: 3  Contact Hours: 40

Course Objective:

1. To understand the importance of Managerial Economics in management and businesses
2. To apply the principles of managerial economics in achieving business objectives
3. Be equipped with the tools necessary in forecasting product demand
4. Understand and be able to apply latest pricing strategies
5. Understand and analyze the macro environment affecting the business decision making.

UNIT –I (6 Hours)

UNIT –II (8Hours)
Supply Analysis; Law of Supply, Supply Elasticity; Analysis and its uses for managerial decision making.
Price of a Product under demand and supply forces. Case Studies

UNIT –III (10Hours)

UNIT –IV (10Hours)

UNIT –V (6Hrs)

### Suggested Readings

1. Managerial Economics, D.N. Dwivedi, Vikas Publication, 7th Ed
4. Managerial Economics, H.L Ahuja, S.Chand, 8th Ed
6. Sociology & Economics for Engineers, Dr. Premvir Kapoor, Khanna Publishing House
Course Objectives:

1) To understand the fundamentals, basic theory and concepts of financial accounting.
2) To have a knowledge about various Accounting Standards used in preparation of financial statements.
3) To have an understanding of preparation and presentation of financial statements.
4) To acquire knowledge about various techniques used for analysing financial statements with its application.
5) To enable students acquainted with current trends and social responsibility accounting.

UNIT I (6Hrs)

Meaning and Scope of Accounting: Evolution and Users of Accounting, Basic Accounting terminologies, Principles of Accounting, Accounting Concepts & Conventions, Accounting Equation, Deprecation Accounting.

UNIT II (6Hrs)

Mechanics of Accounting: Accounting Standards and IFRS: International Accounting Principles and Standards; Matching of Indian Accounting Standards with International Accounting Standards, Double entry system of Accounting, journalizing of transactions; Ledger posting and Trial Balance.

UNIT III (12 Hrs)

Presentation of Financial Statement: Preparation of final accounts (Profit & Loss Account and Balance Sheet) according to companies act 2013 (vertical format), Excel Application to make Balance sheet, Case studies and Workshops, Preparation of Cash Flow Statement and its analysis.

UNIT IV (10 Hrs)

Analysis of financial statement: Ratio Analysis- Solvency ratios, Profitability ratios, activity ratios, liquidity ratios, Market capitalization ratios; leverage Ratio, Detailed Analysis using excel application.

UNIT V (6 Hrs)

Financial Statement Analysis and Recent Types of Accounting: Common Size Statement; Comparative Balance Sheet and Trend Analysis of manufacturing, Service & banking organizations, Case Study and Workshops in analysing Balance sheet. Human Resource Accounting, Forensic Accounting, Accounting for corporate social responsibility.
**Course Outcome:**

After successful completion of this course students will be able to

</tr>
</tbody>
</table>

**Suggested Readings**

2. Essentials of Financial Accounting (based on IFRS), Bhattacharya (PHI, 3rd Ed)
3. Khan and Jain - Financial Management (Tata Mcgraw Hill, 7th Ed.)
4. PC Tulsian - Financial Accounting (Pearson, 2016)
Course Credit: 3    Contact Hours: 40 hours

Course Objectives

1. Understand the different basic concept / fundamentals of business statistics.
2. Understand the importance of measures of Descriptive statistics which includes measures of central tendency, Measures of Dispersion, Time Series Analysis, Index Number, Correlation and Regression analysis and their implication on Business performance.
3. Understand the concept of Probability and its usage in various business applications.
4. Understand the Hypothesis Testing concepts and use inferential statistics- t, F, Z Test and Chi Square Test
5. Understand the practical application of Descriptive and Inferential Statistics concepts and their uses for Business Analytics.

Unit I (10 Sessions): Descriptive Statistics
Meaning, Scope, types, functions and limitations of statistics, Measures of Central tendency – Mean, Median, Mode, Quartiles, Measures of Dispersion – Range, Inter quartile range, Mean deviation, Standard deviation, Variance, Coefficient of Variation, Skewness and Kurtosis.

Unit II (8 Sessions): Time Series & Index Number
Time series analysis: Concept, Additive and Multiplicative models, Components of time series, Trend analysis: Least Square method - Linear and Non- Linear equations, Applications in business decision-making.
Index Numbers:- Meaning, Types of index numbers, uses of index numbers, Construction of Price, Quantity and Volume indices:- Fixed base and Chain base methods.

Unit III (6 Sessions): Correlation & Regression Analysis
Correlation Analysis: Rank Method & Karl Pearson's Coefficient of Correlation and Properties of Correlation.
Regression Analysis: Fitting of a Regression Line and Interpretation of Results, Properties of Regression Coefficients and Relationship between Regression and Correlation.

Unit IV (8 Sessions): Probability Theory & Distribution
Probability: Theory of Probability, Addition and Multiplication Law, Baye’s Theorem
Probability Theoretical Distributions: Concept and application of Binomial; Poisson and Normal distributions.

Unit V (8 Sessions) Hypothesis Testing & Business Analytics
Hypothesis Testing: Null and Alternative Hypotheses; Type I and Type II errors; Testing of Hypothesis: Large Sample Tests, Small Sample test, (t, F, Z Test and Chi Square Test)
Concept of Business Analytics- Meaning types and application of Business Analytics, Use of Spread Sheet to analyze data-Descriptive analytics and Predictive analytics.

**Suggested Readings**

2. Chandrasekaran & Umaparvathi-Statistics for Managers, 1st edition, PHI Learning
MARKETING MANAGEMENT

COURSE CREDIT: 3    HOURS : 40

Course Objectives
1. Assess market opportunities by analyzing customers, competitors, collaborators, context, and the strengths and weaknesses of a company.
2. Understand consumers’ requirements and their behaviors.
3. Develop effective marketing strategies to achieve organizational objectives.
4. Communicate and defend your recommendations and critically examine and build upon the recommendations of your classmates both quantitatively and qualitatively.
5. Develop the understanding the current global and digital aspect of marketing.

Unit 1 (6 hours)
Introduction: Nature and scope of marketing, Various marketing orientations, Need, Want, Demand, Elements of Marketing mix, customer value and the value delivery process.
Understanding Consumer Behavior: Buying motives, factors influencing buying behavior, buying habits, stages in consumer buying decision process, types of consumer buying decisions.

Unit 2 (8 hours)

Unit 3 (8 hours)

Unit 4 (8 hours)

Unit 5 (6 hours)

MBA Revised CURRICULUM Effective from the Session 2020-21

Recommended Text Books:
DESIGN THINKING

Course Credit: 2
Contact Hours: 20

Course Objectives:
1. How to transform creative thinking into design thinking in every stage of your problem
2. How to apply design thinking to your real life problems / situations in order to evolve an innovative and workable solutions

Lecture Sessions on Design thinking (16 hours)

Unit 1- Innovation & Creativity: Meaning of Innovation and creativity. Difference between innovation and creativity, and its role in Industry and organizations, dynamics of creative thinking, Process of Design Thinking, implementing the process in driving innovation, Case Study
Unit 2- An exercise in design thinking & implementing design thinking through a workshop & exercise case studies in design thinking, design thinking process. Case Study
Unit 3- Design Thinking in Various Sectors (Health sector, Finance, Education, Infrastructure) Design thinking case studies in retail, design thinking case studies in banking, design thinking case studies in management decisions

<table>

Books are recommended for the subject design Thinking

1. Design Thinking by Michael G Luchs, K Scott Swan, Abbie Griffin (WILEY)
2. The Design Thinking by Patrick, Michael Lewrick, Larry Leifer (WILEY)
3. The Art of Creative Thinking by Rod Judkins
4. Design Thinking - Strategic innovations by IRIS
Course Objectives
1. To understand business communication strategies and principles for effective communication in
domestic and international business situations.
2. To understand and appropriately apply modes of expression, i.e., descriptive, expositive, narrative,
scientific, and self-expressive, in written, visual, and oral communication.
3. To develop the ability to research and write a documented paper and/or to give an oral presentation.
4. To develop the ability to communicate via electronic mail, Internet, and other technologies for
presenting business messages.
5. To understand and apply basic principles of critical thinking, problem solving, and technical
proficiency in the development of exposition and argument.
UNIT I: (8 Hours)
Introduction: Role of communication – defining and classifying communication – purpose of
communication – process of communication – characteristics of successful communication – importance
of communication in management – communication structure in organization – communication in crisis
barriers to communication. Case Studies
UNITII: (8 Hours)
Oral communication: What is oral Communication – principles of successful oral communication –what
is conversation control – reflection and empathy: two sides of effective oral communication – effective
listening – non – verbal communication. Written communication: Purpose of writing – clarity in writing
– principles of effective writing – approaching the writing process systematically: The 3X3 writing
process for business communication: Pre writing – Writing – Revising – Specific writing features –
coherence – electronic writing process.
UNITIII: (8 Hours)
Business letters and reports: Introduction to business letters – writing routine and persuasive letters –
positive and negative messages- writing memos – what is a report purpose, kinds and objectives of
report writing. Presentation skills: What is a presentation – elements of presentation – designing a
presentation. Advanced visual support for business presentation types of visual aid
UNITIV: (8 Hours)
Employment communication: Introduction – writing CVs – Group discussions – interview skills Impact
of Technological Advancement on Business Communication networks – Intranet – Internet – e mails –
SMS – teleconferencing – video conferencing. Case Studies
UNITV : (8 Hours)
Group communication: Meetings – Planning meetings – objectives – participants – timing – venue of
meetings – leading meetings. Media management – the press release press conference – media
**Course Outcomes**
Upon successful completion of this course, the student should be able to:

</tr>
</tbody>
</table>

**Suggested Readings:**
2. Kulbhushan Kumar & R.S. Salaria, Effective Communication Skills, Khanna Publishing House, Delhi
5. Varinder Bhatia, Business Communications, Khanna Publishing House
Course Objectives

1. To provide knowledge about the functioning of computers and its uses for managers
2. To provide hands on learning on Internet and its applications
3. To provide hands on learning on Word processing software
4. To provide hands on learning of applications on Spreadsheet software
5. To provide hands on learning on Presentation software

UNIT I (05 hours) Conceptual Framework

**Hardware:** (a) Input devices - keyboard, printing devices, voice speech devices, scanner, MICR, OMR, Bar code reader, digital camera etc. (b) Output devices - Visual Display UNIT, printers, plotters (c) Storage Devices – Magnetic storage devices, Optical storage devices, Flash Memory.

**Software:** Types of software with examples; Introduction to languages, compiler, interpreter and Assembler, Operating System Functions, Types and Classification, Elements of GUI based operating system. Network and Internet: Types of computer networks (LAN, WAN and MAN), Netiquettes, Basic services over Internet like WWW, FTP, Telnet, Gopher, URL, Domain names, Web Browsers, Multimedia and its applications: Concepts of Text, Graphics, Animation, Audio, Images, Video. Multimedia Application in Education, Entertainment, Marketing. Names of common multimedia file formats.

UNIT II: Windows and Users Interface (Lab Work) - 7 hours

UNIT III: Word Processor Software (Lab Work) – 8 hours

UNIT IV: Spreadsheet Software (Lab Work) – 10 hours

UNIT V: Presentation Software (lab Work) – 8 hours

Notes Pages and Handouts, Drawing and Working with Objects, Adding Clip Art and other pictures, Designing Slide Shows, Running and Controlling a Slide Show, Printing Presentations.

Course Outcomes

Upon successful completion of this course, the student should be able to:

Suggested Readings

2. Shrivastava-Fundamental of Computer & Information Systems (Wiley Dreamtech)
5. Introduction to Computers, Norton P. (TATA McGraw Hill)
7. Satish Jain-BPB’s Computer Course Windows 10 with MS Office 2016 (BPB)
MINI PROJECT -1

Course Credit -2

Course Objective-
1. To develop an innovative idea for product or services in form of a project report.
2. To understand importance and relevance of innovative idea, its feasibilities and detail descriptions.

Project/Practical work / Seminar
In first semester, the students are required to develop an innovative idea for product or services and a project report to be prepared on that idea under the guidance of faculty member. Report will be prepared individually and this report will consist of importance and relevance of innovative idea, its feasibilities and detail descriptions. The report will be evaluated by one external examiner appointed by university. Student has to present his output through a seminar.

Semester II

Business Environment & Legal Aspect of Business

Course Credit: 3  Contact Hours: 40

Course Objectives:

1. The basic objective of the course is to develop understanding and provide knowledge about business environment to the management students.

2. To promote basic understanding on the concepts of Business Environment and international business environment.

3. To provide basic understanding of law of contract

4. To impart basic understanding of provisions of Companies Act concerning incorporation and regulation of business organizations.

5. To appraise the students on the leading practical application oriented case studies – relevant and updated and analyzing case laws in arriving at conclusions facilitating business decisions.

Unit I - (10Hrs)

Introduction to Micro Environment –
Michael Porter’s Five Forces Analysis, Competitive Strategies

Unit II - (6 Hrs)

Macro Cont: Economic, Socio-Cultural, Competitive & International Environment –
Economy, Competition, Socio-cultural and International); Business Environment with reference to Global Integration; Comparative Analysis of Business Environment: India and Other Countries, Factors affecting international business environment, Business Policy : LPG model & International forces in business.

UNIT- III (8 hrs)

Sale of Goods Act: Essentials, sale v/s agreement to sell. Condition v/s warranties, rights of unpaid seller

UNIT IV (8hrs)

Companies Act Definition, characteristics and kinds of companies, steps in formation of company. Memorandum of Association, Articles of Association, prospectus. Directors: appointment, power, duties and liabilities, meeting and resolutions: types of meetings. Auditor: appointment, rights and liabilities, modes of winding up of a company.
UNITV (8 hrs)

Consumer Protection Act: Definitions - Aims and objectives, Consumer protection councils, Redressal agencies and penalties for violation.

The Information Technology Act: Definition, Digital Signature, Electronic Governance, Attribution, Acknowledgment and Dispatch of Electronic Records, Sense Electronic Records and Sense Digital Signatures, Regulation of Certifying Authorities, Digital Signature Certificates, Duties of Subscribers, Penalties and Offences.

S. No. | Course Outcome | Bloom’s Taxonomy |
--- | --- | --- |
1 | CO1) Develop understanding and fundamental knowledge about business environment | Remembering (k1) Knowledge (K2) |
2 | CO2) Develop understanding on the concepts of Business Environment and international business environment. | K2 Knowledge |
3 | CO3) Develop basic understanding of law of contract | K2 Knowledge |
4 | CO4) understanding of provisions of Companies Act concerning incorporation and regulation of business organizations | K2 Knowledge |
5 | CO5) Able to analyze case laws in arriving at conclusions facilitating business decisions. | K4 Applying K5 Analysing |

Suggested Readings

5. International Business Environment—Ian Brooks, Jamie Weatherston and GrahmWilkinson
6. Kuchhal M.C. - Business Law (Vikas Publication)
Course Objectives: In this course the students will learn the basic concepts and frameworks of Human Resource Management (HRM) and understand the role that HRM has to play in effective business administration. It will provide an insight as to how to use Human Resource as a tool to implement strategies.

UNIT I: (7 Hours)
Essentials of HRM: Functions of HRM, HRM vs.HRD, Strategic HRM: Meaning and Roles in Strategy formulation and implementation, Barriers to strategic HRM, Linking HR strategy with business strategy, Roles of HR Manager, roles of HR in merger and acquisitions, Technology & HR and changing roles of HR due to technology, HRM linkage with TQM & productivity. Case Studies

UNIT II: (8 Hours)

UNIT III: (8 Hours)
Employee Training & Development: Meaning importance of Training, types and methods and types of training, career planning, promotion, transfer, demotion and separation, Performance Appraisal: Meaning and types of appraisal, Job Evaluation: Meaning and methods of job evaluation. Case Studies

UNIT IV: (9 Hours)
Compensation Management and Employee Relations: Introduction to compensation management, Components and structure of employee compensation, Factors affecting employee compensation, Employee incentive schemes, and recent trends in compensations management, Meaning of employee relation and industrial relations. Case Studies

UNIT V: (8 Hours)
Employee Safety/ Health and International Human Resource Management: Needs and leagal provision of employee health, measures to promote employee health, purpose of employee safety, accidents: causes & prevention, effective safety management, & legal provisos. basic principles governing International Human Resource Case Studies

Suggested Readings
BUSINESS RESEARCH METHODS

Course Credit: 3

Course objectives
1. Understand the concept / fundamentals of research and their types.
2. Understand the practical application of various research techniques.
3. Understand the importance of scaling & measurement techniques and sampling techniques.
4. Understand the importance of coding, editing, tabulation and analysis in doing research.
5. Understanding and applying the concept of statistical analysis which includes ANOVA technique and technique of report writing.

Unit 1 (8 Sessions)
Research: – Definition, Meaning, Importance types and Qualities of Research; Research applications in functional areas of Business, Emerging trends in Business research.
Research & the Scientific Method: Characteristics of scientific method. Steps in Research Process

Unit 2 (8 Sessions)
Research design: Concept, Features of a good research design, Use of a good research design; Qualitative and Quantitative research approaches, Comparison – Pros and Cons of both approaches.
Exploratory Research Design: Concept, Types: Qualitative techniques – Projective Techniques, Depth Interview, Experience Survey, Focus Groups, Observation.
Descriptive Research Designs: Concept, types and uses. Concept of Cross-sectional and Longitudinal Research
Experimental Design: Concept of Cause, Causal relationships, Concept of Independent & Dependent variables, concomitant variable, extraneous variable, Treatment, Control group.

Unit 3 (6 Sessions)

Unit 4 (6 Sessions)
Sampling:Basic Concepts: Defining the Universe, Concepts of Statistical Population, Sample, Characteristics of a good sample. Sampling Frame (practical approach for determining the sample frame expected), Sampling errors, Non Sampling errors, Methods to reduce the errors, Sample Size constraints, Non Response.
Probability Sample: Simple Random Sample, Systematic Sample, Stratified Random Sample, Area Sampling & Cluster Sampling.
Non Probability Sample: Judgment Sampling, Convenience Sampling, Purposive Sampling, Quota Sampling & Snowballing Sampling methods. Determining size of the sample – Practical considerations in sampling and sample size, sample size determination.

Unit 5 (8 Sessions)
Data Analysis: Editing, Coding, Tabular representation of data, frequency tables, Construction of frequency distributions, Graphical Representation of Data: Appropriate Usage of Bar charts, Pie charts, Histogram.

**COURSE OUTCOME**

1. Research Methodology, Deepak Chawla, Neena Sondhi, Vikas Publication
2. Business Research Methods, Naval Bajpai, Pearson Education
FINANCIAL MANAGEMENT AND CORPORATE FINANCE

Course Credit: 3  Contact Hours: 40 Hrs

Course Objectives: This course is intended to introduce the basic theory, concepts and practical applications in corporate finance and to enable students to analyse various corporate decisions. The course objectives are outlined below:

1) To understand the fundamentals, various models and agency problems of Corporate Finance.
2) To acquire knowledge about various techniques used for analysing various long-term projects.
3) To have an understanding about various capital structure techniques and selecting best source of finance.
4) To have an understanding of various dividend models and its applicability.
5) To acquaint students about corporate valuation in mergers and acquisitions.

UNIT I (6 Hrs)

UNIT II (10 Hrs)

UNIT III (10 Hrs)
Financial Decision: Capital Structure, Relevance and Irrelevancy theory, Leverage analysis – financial, operating and combined leverage along with its implications, EBIT EPS Analysis, Point of Indifference.

UNIT IV (10 Hrs)

UNIT V (4 Hrs)

Course Outcome: After successful completion of this course students will be able:
<table>
<thead>
<tr>
<th>S.No</th>

<th>Bloom’s Taxonomy</th>
</tr>
</thead>
</table>
| 1.   | CO1 Understand the different basic concept / Models of Corporate Finance and Governance | • Knowledge (K2)  
• Remembering(K1) |
| 2.   | CO2 Understand the practical application of time value of money and evaluating long term investment decisions | • Analyzing (K5)  
• Evaluating(K7) |
| 3.   | CO3 Develop analytical skills to select the best source of capital, structure and leverage. | • Analyzing(K5)  
• Synthesizing(K6) |
| 4.   | CO4 Understand the use and application of different models for firm’s optimum dividend pay-out. | • Comprehending(K3)  
• Applying(K4) |
| 5.   | CO5 Understand the recent trends of mergers and acquisition and its valuation | • Comprehending(K3)  
• Synthesizing (K6) |

Suggested Readings
1) Khan and Jain - Financial Management (Tata McGraw Hill, 7th Ed.)
2) Pandey I M - Financial Management (Vikas, 11th Ed.)
3) William HakkaBettnerCarcello- Financial and Management Accounting (TMH-16th Ed.)
5) Prasanna Chandra - Fundamentals of Financial Management (TMH, 9th Ed.)
6) Bark DemazoThampy- Financial Management (Pearson, 2nd Ed.)
7) R P Rustagi - Financial Management (Galgotia, 2000, 2nd revised ed.)
9) Ravi.M Kishore – Financial Management (Taxman, 7th Ed)
10) Fundamentals to Financial Management, Brigham & Houston, 14/e, Cengage Learning
Course Credit: 3
Contact Hours: 40

Course Objectives:

1. To understand the role of Operations in overall Business Strategy of the firm.
2. To understand the application of operations management policies and techniques to the service sector as well as manufacturing firms.
3. To identify and evaluate the key factors and their interdependence of these factors in the design of effective operating systems.
4. To understand the trends and challenges of Operations Management in the current business environment.
5. To familiarize the students with the techniques for effective utilization of operational resources and managing the processes to produce good quality products and services at competitive prices.

UNIT –I (7 sessions) Production Concepts:

UNIT –II (8 sessions) Operations Concepts:
Services scenario in India, difference between product and service, characteristics of services, classification of services, product and service design, factors affecting service design, service designing process, service blueprinting, service capacity planning. Dimensions of quality in services, understanding service quality gap, measuring service quality using SERVQUAL model. Case Studies

UNIT-III (10 sessions) Material and Inventory Management:
Types of production planning, process of production planning and control (PPC) – routing, scheduling and loading. Master production schedule, aggregate production planning. Types of inventories, inventory control techniques- EOQ, ABC, VED, FSN, HML and SDE (Simple numerical problems on Inventory control techniques). Just-in-time (JIT) and KANBAN. Case Studies

UNIT-IV (8 sessions) Supply Chain Management:
Overview of supply chain management, conceptual model of SCM, supply chain drivers, measuring supply chain performance, core and reverse supply chain, global supply chain, inbound and outbound logistics, Bullwhip effect in SCM, push and pull systems, lean manufacturing, agile manufacturing, role of IT in SCM. Demand forecasting in supply chain—Simple moving average method, weighted moving average method, linear regression and exponential smoothing method. Case Studies
UNIT-V (7 sessions) Productivity and Quality:
TQM, Deming’s 14 principles, Juran’s quality triology, PDCA cycle, KAIZEN, quality circles, 7QC tools and its 7 new management tools, ISO 9000-2000 clauses, six sigma, Total Productive Maintenance (TPM), 5S. Case Studies

Expected Course Outcomes:

<table>

</thead>
</table>
| CO1.  | Understand the role of Operations in overall Business Strategy of the firm - the application of OM policies and techniques to the service sector as well as manufacturing firms. | • Knowledge (K2)  
• Comprehending (K3)  
• Remembering (K1) |
| CO2.  | Understand and apply the concepts of Material Management, Supply Chain Management and TQM perspectives. | • Knowledge (K2)  
• Remembering (K1)  
• Applying (K4) |
| CO3.  | Identify and evaluate the key factors and their interdependence of these factors in the design of effective operating systems. | • Comprehending (K3)  
• Applying (K4) |
| CO4.  | Analyze / understand the trends and challenges of Operations Management in the current business environment. | • Analyzing (K5) |
| CO5.  | Apply techniques for effective utilization of operational resources and managing the processes to produce good quality products and services at competitive prices. | • Synthesizing (K6)  
• Evaluating (K7) |

Suggested Readings:-
8. Gopalakrishnan, P. & Sundaresan, M. – Materials Management (Prentice Hall of India)
QUANTITATIVE TECHNIQUES FOR MANAGER

Course Objectives

1. Understand the importance of the use of OR application in decision Making environment
2. To formulate LPP and Obtain Graphical Solutions & Acquire General idea of the Simplex method.
3. To understand and solve transportation & assignment models.
4. To know optimal sequence model and understand concepts of queuing theory.
5. To identify right time for replacement of equipment and understand project management techniques

Unit I (6 Sessions)-Operations Research & Decision Making Environments

Unit II (10 Sessions)-Linear Programming Problem & Transportation Problem
Linear programming: Mathematical formulations of LP Models for product-mix problems; graphical and simplex method of solving LP problems; duality.
Transportation problem: Various methods of finding Initial basic feasible solution-North West Corner Method, Least Cost Method & VAM Method and optimal solution-Stepping Stone & MODI Method, Maximization Transportation Problem

Unit III (8 Sessions)-Assignment model & Game Theory
Assignment model: Hungarian Algorithm and its applications, Maximization Assignment Problem.
Game Theory: Concept of game; Two-person zero-sum game; Pure and Mixed Strategy Games; Saddle Point; Odds Method; Dominance Method and Graphical Method for solving Mixed Strategy Game.

Unit IV (6 Sessions)-Sequencing & Queuing Theory
Sequencing Problem: Johnsons Algorithm for n Jobs and Two machines, n Jobs and Three Machines, Two jobs and m - Machines Problems.
Queuing Theory: Characteristics of M/M/1 Queue model; Application of Poisson and Exponential distribution in estimating arrival rate and service rate; Applications of Queue model for better service to the customers.

Unit V (6 Sessions)-Replacement Problem & Project Management
Replacement Problem: Replacement of assets that deteriorate with time, replacement of assets which fail suddenly.
Project Management: Rules for drawing the network diagram, Applications of CPM and PERT techniques in Project planning and control; crashing of operations.
## Course Outcomes

3. Apte-Operation Research and Quantitative Techniques (Excel Books)
5. Natarajan- Operation Research(Pearson)
6. Singh & Kumar—Operation Research(UDH Publisher edition 2013)
8. Vohra - Quantitative Techniques in Management (Tata McGraw-Hill, 2nd)
DIGITAL MARKETING AND E-COMMERCE

COURSE CREDIT: 3 HOURS: 40

Course Objectives
1. To help Student understand the concept of Digital Marketing & E-commerce in today’s scenario
2. To enable student in creating and maintaining a good website and blog posts.
3. To make student understand the importance of SEO and Email Marketing in today’s modern world
4. To understand the functioning and importance of Social Media Marketing via various platforms
5. To understand various Analytics tools of online marketing

UNIT 1 (8 Hours)
Introduction to Digital Marketing & Website and Blog Development: Introduction to Digital Marketing and its Significance; Traditional Marketing Vs Digital Marketing; Digital Marketing Process; The contemporary digital revolution, digital transformation framework. Types of websites, Keywords, Understanding Domain and Webhosting, Building Website/Blog using CMS WordPress, Using WordPress Plug-ins; Blog Creation: Including Headlines, Links, Posts ; Using various plug-ins like Elimentor

UNIT 2 (8 Hours)
SEO & Email-Marketing: Introduction to SEO; SEO Keyword Planner Tools; On Page SEO Techniques: Indexing and Key Word Placement, Content Planning & Optimization, Display Advertising, Various SEO Plug-in, Off–Page SEO Techniques; Email Marketing- Introduction and Significance, campaigns using Mail Chimp; Email Marketing Strategy and Monitoring.

UNIT 3 (8 Hours)
SEM & Social Media Marketing: Introduction to SEM, Mobile Marketing, Video Marketing on YouTube. Introduction to Social Media Marketing: Facebook, Instagram, Linked-in, Twitter, Google G Suit and online marketing campaigns on theses Social Media platforms. Content Marketing, Content creation process, Influencer marketing.

UNIT 4 (6 Hours)

UNIT 5 (6 Hours)

MANAGEMENT INFORMATION SYSTEMS

Course Credit: 2
Contact Hours: 20

Course Objective
1. To help the students understand the importance of information management in business and management
2. To provide understanding about different types of information systems in business
3. To apply the theory and concepts in practical with help of software
4. To understand various security and ethical issues with Information Systems
5. To provide hands on learning of applications on Spreadsheet and database software

UNIT -I (6 Hours)
Management Information Systems - Need, Purpose and Objectives, Contemporary Approaches to MIS, Information as a strategic resource, Use of information for competitive advantage, MIS as an instrument for the organizational change. Information Technology – Characteristics and emerging trends, IT Capabilities and their organizational impact, IT enabled services. Transaction Processing System: Characteristics and its importance

UNIT -II (6 Hours)

UNIT -III (8 Hours)
Managing Data Resources- The need for data management, Challenges of data management, Data independence, Data redundancy, Data consistency, Data administration. Database Management System – Concepts and types of DBMS, Fields, Records, Table, View, Reports and Queries. Data warehouse and Data mining – Characteristics and uses of Data warehouse, Techniques of Data Mining, Business Intelligence

Database Management System (Lab): Creation of Table, View and Reports. Basics of SQL and running queries

Suggested Readings

1. Management Information System – James ‘O’ Brian
6. Computer Applications in Business (CBCS) by Dr. Sushil Kumar Sharma & Ms. Mansi Bansal (Taxmann)
7. Excel 2019 All-In-One: Master the new features of Excel 2019 / Office 365, Lokesh Lalwani (BPB)
IT SKILLS LAB-2

Lab work 20 Hours

Course Objective

1. To develop pivot table and understand the validating & auditing techniques
2. To understand different charting techniques in MS Excel
3. To understand different formatting techniques in MS Excel

Unit I (Lab work on spreadsheet)

Pivot Table: Developing Pivot Table, Analyzing data using goal seek and solver, Scenarios Create named scenarios. Show, edit, delete scenarios, Creating a scenario summary report. Validating and Auditing: Set, edit validation criteria for data entry in a cell range like: whole number, decimal, list, date, time, Trace precedent, dependent cells. Identify cells with missing dependents. Creating applications in Spreadsheet and Macros.

Unit II (Lab work on spreadsheet) 15 Hours

Creating and formatting Charts: Understanding chart types, column chart, bar chart, line chart, pie chart, XY Scatter chart, Area chart, surface chart, bubble chart. Create a combined chart like: column and line, column and area. Change the chart type for a defined data series. Add, delete a data series in a chart. Re-position chart title, legend, data labels. Change scale of value axis: minimum, maximum number to display, major interval. Change display units on value axis without changing data source: hundreds, thousands, millions. Format columns, bars, pie slices, plot area, chart area to display an image.

MINI PROJECT -2

Course Credit: 2

Seminar by students

Objective –
1. To identify the issues challenge of the industry
2. To able to prepare report on the application of emerging technologies in the selected industry

In second semester, the students are required to take one industry as per his/her interest for analysis and preparing a project report. Preference should be given on the application of emerging technologies in the selected industry. It may consists of Fintech, Block chain, Financial Services, Data Science, Social Entrepreneurship or any other suitable area of interest. The report will be prepared individually. The report will be evaluated by one external examiner appointed by university.
