ROE-071 MODELLING AND SIMULATION OF DYNAMIC SYSTEMS

COURSE OBJECTIVE: Students undergoing this course are expected to-
1. Define, describe and apply basic concepts related to modeling and simulation.
2. Use conservation laws and constitutive relationships and other physical relations to model mechanical, electrical and flow systems, and combinations of these.

COURSE OUTCOME: After completion of the course student will be able to-
CO1: Define, describe and apply basic concepts related to modeling and simulation.
CO2: Construct bond graphs for the type of systems mentioned above, simplify and analyze the bond graph according to causality conflicts.
CO3: Use conservation laws and constitutive relationships and other physical relations to model mechanical, electrical and flow systems.
CO4: Find dynamic response and transfer function using various tools for system modeling.
CO5: Model and simulate mechanical and electrical systems using the computer tools Simulink.

**ROE-072 INTRODUCTION TO SMART GRID**

**COURSE OBJECTIVE:** *Students undergoing this course are expected to-*

1. Present the fundamental concepts associated with Smart Grids.
2. Review renewable energy generation, grid integration energy storage technologies and future developments
3. Introduce advanced management and control concepts of Smart Grids.

**COURSE OUTCOME:** *After completion of the course student will be able to-*

CO1: Identify the key elements of Smart Grids and visualize the roadmap towards next-Gen electricity networks.

CO2: Evaluate technology options pertaining to renewable energy generation, energy storage, data handling and communications for Smart Grids.

CO3: Justify technological and economical choices in the context of existing commercial Smart Grids projects.

CO4: Determine the relevance of Smart Grids projects, develop ways to evaluate their impacts and implications.

CO5: Analyse the new roles of utilities and consumers in Smart Grids.

**ROE-073  CLOUD COMPUTING**

**COURSE OBJECTIVE:** Students undergoing this course are expected to-

1. Provide students with the fundamentals and essentials of Cloud Computing.
2. Provide students a sound foundation of the Cloud Computing so that they are able to start using and adopting Cloud Computing services and tools in their real life scenarios.

**COURSE OUTCOME:** After completion of the course student will be able to-

- CO1: Articulate the main concepts, key technologies, strengths and limitations of cloud computing.
- CO2: Learn the key and enabling technologies that help in the development of cloud.
- CO3: Develop the ability to understand and use the architecture of compute and storage cloud, service and delivery models.
- CO4: Explain the core issues of cloud computing such as resource management and security.
- CO5: To appreciate the emergence of cloud as the next generation computing paradigm.

ROE- 074 Understanding the Human Being Comprehensively–Human Aspirations and its Fulfillment

COURSE OBJECTIVE: Students undergoing this course are expected to-

1. To help the students having the clarity about human aspirations, goal, activities and purpose of life.
2. To facilitate the competence to understand the harmony in nature/existence and participation of human being in the nature/existence.
3. To help the students to develop the understanding of human tradition and its various components.

COURSE METHODOLOGY:

1. The methodology of this course is explorational and thus universally adaptable. It involves a systematic and rational study of the human being vis-à-vis the rest of existence.
2. It is free from any dogma or set of do’s and don’ts related to values.
3. It is a process of self-investigation and self-exploration, and not of giving sermons. Whatever is found as truth or reality is stated as a proposal and the students are facilitated and encouraged to verify it in their own right, based on their Natural Acceptance and subsequent Experiential Validation.
4. This process of self-exploration takes the form of a dialogue between the teacher and the students to begin with, and then to continue within the student leading to continuous self-evolution.
5. This self-exploration also enables them to critically evaluate their pre-conditionings and present beliefs.

<table>
<thead>
<tr>
<th>Unit</th>
<th>Topic</th>
<th>Lectures</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td><strong>Introduction:</strong> The basic human aspirations and their fulfillment through Right understanding and Resolution; All-encompassing Resolution for a Human Being, its details and solution of problems in the light of Resolution.</td>
<td>8</td>
</tr>
<tr>
<td>2</td>
<td><strong>Understanding Human being and its expansion:</strong> The domain of right understanding starts from understanding the human being (the knower, the experiencer and the doer); and extends up to understanding nature/existence – its interconnectedness and co-existence; and finally understanding the role of human being in existence (human conduct).</td>
<td>8</td>
</tr>
</tbody>
</table>
### Activities of the Self:
Understanding the human being comprehensively is the first step and the core theme of this course; human being as co-existence of the self and the body; the activities and potentialities of the self; Reasons for harmony/contradiction in the self.

### Understanding Co-existence with other orders:
The need and the process of inner evolution (through self-exploration, self-awareness and self-evaluation) - particularly awakening to activities of the Self: Realization, Understanding and Contemplation in the Self (Realization of Co-Existence, Understanding of Harmony in Nature and Contemplation of Participation of Human in this harmony/order leading to comprehensive knowledge about the existence)

### Expansion of harmony from self to entire existence:
Understanding different aspects of All-encompassing Resolution (understanding, wisdom, science etc.), Holistic way of living for Human Being with All-encompassing Resolution covering all four dimensions of human endeavour viz., realization, thought, behaviour and work (participation in the larger order) leading to harmony at all levels from self to Nature and entire Existence.

15. Vyavahatmak Janvad, A. Nagraj, Divya Path Sansthan, Amarkantak, India.
**COURSE OBJECTIVE:** Students undergoing this course are expected to-

1. Acquire the knowledge on advanced algebraic tools for the description of motion.
2. Develop the ability to analyze and design the motion for articulated systems.
3. Develop an ability to use software tools for analysis and design of robotic systems

**COURSE OUTCOME:** After completion of the course student will be able to-

- CO1: Use matrix algebra and Lie algebra for computing the kinematics of robot.
- CO2: Calculate the forward kinematics and inverse kinematics of serial and parallel robots.
- CO3: Calculate the Jacobian for serial and parallel robot.
- CO4: Do the path planning for a robotic system.
- CO5: Be proficient in the use of Maple or Matlab for the simulation of robots.

ROE-077  MODELING OF FIELD-EFFECT NANO DEVICES

COURSE OBJECTIVE: Students undergoing this course are expected to-

3. Introduce novel MOSFET devices and understand the advantages of multi-gate devices.
4. Introduce the concepts of nanoscale MOS transistor and their performance characteristics.
5. Study the various nano-scaled MOS transistor circuits.

COURSE OUTCOME: After completion of the course student will be able to-

CO1: Study the MOS devices used below 10nm and beyond with an eye on the future.
CO2: Understand and study the physics behind the operation of multi-gate systems.
CO3: Design circuits using nano-scaled MOS transistors with the physical insight of their functional characteristics.
CO4: Understand and study the physics behind the Radiation effects in SOI MOSFETs.
CO5: Understand the impact of device performance on digital circuits.

ROE-078 QUALITY MANAGEMENT

COURSE OBJECTIVE: Students undergoing this course are expected to-
1. Introduce the importance of quality in improving competitiveness.
2. Understand the Implication of Quality on Business.
3. Implement Quality Implementation Programs.
4. Have exposure to challenges in Quality Improvement Programs.

COURSE OUTCOME: After completion of the course student will be able to-
CO1: Realize the importance of significance of quality.
CO2: Manage quality improvement teams.
CO3: Identify requirements of quality improvement programs.
CO4: Identify improvement areas based on cost of poor quality.
CO5: Organize for quality and development of quality culture through small group activities.

ROE-080 AN INTRODUCTION TO BUDDHA AND JAIN DARSHAN

COURSE OBJECTIVE: Students undergoing this course are expected to-

1. To help students understand the basic principles of Buddha and Jain Darshan
2. To help students understand the existential realities based on Buddha and Jain Darshan
3. To help them to see the participation of human beings in the nature realities based on Buddha and Jain Darshan
4. To help students apply this understanding to make their living better on this mother earth.
5. To facilitate the students in applying this understanding in their profession and lead an ethical life

COURSE OUTCOME: After completion of the course student will be able to-

1. Understand the basic concepts of Buddha and Jain Darshan.
2. Understand the human being, the needs and activities of human being based on Buddha and Jain Darshan.
3. Understand the whole existence based on Buddha and Jain Darshan.
4. Understand the role of human being in the entire existence, thus getting clarity about values at all levels of living based on Buddha and Jain Darshan.
5. Understand the foundation of human tradition based on Buddha and Jain Darshan.

ROE-080 AN INTRODUCTION TO BUDDHA AND JAIN DARSHAN

Buddha Darshan was propounded by Gautam Buddha about 2500 years back. Around same time, Jain Darshan was given by Mahavira. This course outlines the basic concepts and principles of the two philosophies and provides scope for further reading of the two philosophies so as to gain clarity about human life and the existence.

<table>
<thead>
<tr>
<th>Unit</th>
<th>Topic</th>
<th>Lectures</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Introduction to Buddha and Jain Darshan and their Basics: Need to study Buddha and Jain Darshan; some basic principles of Buddha Darshan – law of impermanence (changability); four noble truths; eightfold path; law of cause-action (pratityasamutpaad); inseparability of body and chittsankagh. Some basic principles of Jain Darshan – samyakgyan, samyak darshan, samyak charitra, syadvaad, anekantavaad, naya-nishchaya and behaviour</td>
<td>8</td>
</tr>
<tr>
<td>2</td>
<td>Salient Words and Definitions of Buddha Darshan: Definition of salient words of Buddha Darshan – nirvana, dhamma, tri-ratna(Buddha, Dharma and Sangh), pragya, karma, parmi, ashta-kalap, panchsankagh, chitt, vritti, samvr, trishna, shad ayatan, samvedna, vipassana, anitya, maitri, bhram-vihaar, tathagata, arahant</td>
<td>8</td>
</tr>
<tr>
<td>3</td>
<td>Purpose and Program for a Human Being based on Buddha Darshan: Purpose-freedom from suffering, nirvana; root of suffering- vikaar – raga, dvesha and moha, Progam – various steps of meditation for attaining knowledge; shamath and vipassana – public path for pragya; sheel-samadhi- pragya; samatva/sakshikisadhna; combination of chintan (understanding) and practice; renunciation of body and sensation as a form of experimentation.</td>
<td>8</td>
</tr>
</tbody>
</table>
Salient Words and Definitions of Jain Darshan: Definition of salient words of Jain Darshan – tatva, ahrt, jin, anuvrit, tirthankara, sangh, atma, pramaan, kaal, pudgal, ahimsa, satya, astaya, aparigraha, bhramchara, tap, leshya, lok. Basic realities – description of nine elements in existence (jeev, ajeev, bandh, punya, paap, aashrav, samvar, nirjara, moksha), 6 dravya of lok – dharma, adhrma, kaal, pudgal, jeev; various types of pragya, various stages of realisation.

Purpose and Program for a Human Being based on Jain Darshan: Purpose (goal) - moksha, Program- following five mahavrat, samyakdarshan-gyan-charitra, tap, ksanti, mukti.

**Note:**

1. The Student shall choose an open Elective from the list in such a manner that he/she has not studied the same course in any form during the degree programme.
2. * It is mandatory that for these two subjects (ROE087 & ROE088) only trained faculty (who had done the FDP for these courses) will teach the courses.
UNIT-I
Introduction to Digital Marketing: The new digital world - trends that are driving shifts from traditional marketing practices to digital marketing practices, the modern digital consumer and new consumer’s digital journey. Marketing strategies for the digital world-latest practices.

UNIT-II
Social Media Marketing -Introduction to Blogging, Create a blog post for your project. Include headline, imagery, links and post, Content Planning and writing. Introduction to Face book, Twitter, Google +, LinkedIn, YouTube, Instagram and Pinterest; their channel advertising and campaigns

UNIT-III
Acquiring & Engaging Users through Digital Channels: Understanding the relationship between content and branding and its impact on sales, search engine marketing, mobile marketing, video marketing, and social-media marketing. Marketing gamification, Online campaign management; using marketing analytic tools to segment, target and position; overview of search engine optimization (SEO).

UNIT-IV
Designing Organization for Digital Success: Digital transformation, digital leadership principles, online P.R. and reputation management. ROI of digital strategies, how digital marketing is adding value to business, and evaluating cost effectiveness of digital strategies

UNIT-V
Digital Innovation and Trends: The contemporary digital revolution, digital transformation framework; security and privatization issues with digital marketing Understanding trends in digital marketing – Indian and global context, online communities and co-creation,

Text books:
1. Moutsy Maiti: Internet Marketing, Oxford University Press India
2. Vandana, Ahuja; Digital Marketing, Oxford University Press India (November, 2015).
5. Tracy L. Tuten & Michael R. Solomon: Social Media Marketing (Sage Publication)
ROE082 ENTREPRENEURSHIP DEVELOPMENT L T P 3 0 0

UNIT-I
Entrepreneurship- definition, growth of small scale industries in developing countries and their positions vis-a-vis large industries; role of small scale industries in the national economy; characteristics and types of small scale industries; demand based and resources based ancillaries and sub-control types. Government policy for small scale industry; stages in starting a small scale industry.

UNIT-II
Project identification- assessment of viability, formulation, evaluation, financing, field-study and collection of information, preparation of project report, demand analysis, material balance and output methods, benefit cost analysis, discounted cash flow, internal rate of return and net present value methods.

UNIT-III
Accountancy- Preparation of balance sheets and assessment of economic viability, decision making, expected costs, planning and production control, quality control, marketing, industrial relations, sales and purchases, advertisement, wages and incentive, inventory control, preparation of financial reports, accounts and stores studies.

UNIT-IV
Project Planning and control: The financial functions, cost of capital approach in project planning and control. Economic evaluation, risk analysis, capital expenditures, policies and practices in public enterprises. profit planning and programming, planning cash flow, capital expenditure and operations. control of financial flows, control and communication.

UNIT-V
Laws concerning entrepreneur viz, partnership laws, business ownership, sales and income taxes and workman compensation act. Role of various national and state agencies which render assistance to small scale industries.

Text books:
UNIT-I

DECISION TREE LEARNING - Decision tree learning algorithm-Inductive bias- Issues in Decision tree learning; ARTIFICIAL NEURAL NETWORKS – Perceptrons, Gradient descent and the Delta rule, Adaline, Multilayer networks, Derivation of backpropagation rule Backpropagation AlgorithmConvergence, Generalization;

UNIT-II

UNIT-III

UNIT-IV

Computational Learning Theory: Sample Complexity for Finite Hypothesis spaces, Sample Complexity for Infinite Hypothesis spaces, The Mistake Bound Model of Learning; INSTANCE-BASED LEARNING – k-Nearest Neighbour Learning, Locally Weighted Regression, Radial basis function networks, Case-based learning

UNIT-V

Genetic Algorithms: an illustrative example, Hypothesis space search, Genetic Programming, Models of Evolution and Learning; Learning first order rules-sequential covering algorithms-General to specific beam search-FOIL; REINFORCEMENT LEARNING - The Learning Task, Q Learning.

ROE084  MICRO AND SMART SYSTEMS  L T P 3 0 0

UNIT-I

UNIT-II
Micro sensors, actuators, systems and smart materials: Silicon capacitive accelerometer, piezoresistive pressure sensor, conductometric gas sensor, an electrostatic combo-drive, a magnetic microrelay, portable blood analyzer, piezoelectric inkjet print head, micromirror array for video projection, smart materials and systems.

UNIT-III
Micromachining technologies: silicon as a material for micro machining, thin film deposition, lithography, etching, silicon micromachining, specialized materials for Microsystems, advanced processes for micro fabrication.

UNIT-IV

UNIT-V

Text books:
open elective I 2019-20 CBCS System R series (VII & VIII Semester)  Page 6

ROE085 OPERATIONS RESEARCH  L T P 3 0 0

UNIT-I Introduction: Definition and scope of operations research (OR), OR model, solving the OR model, art of modelling, phases of OR study. Linear Programming: Two variable Linear Programming model and Graphical method of solution, Simplex method, Dual Simplex method, special cases of Linear Programming, duality, sensitivity analysis.

UNIT-II Transportation Problems: Types of transportation problems, mathematical models, transportation algorithms, Assignment: Allocation and assignment problems and models, processing of job through machines.

UNIT-III Network Techniques: Shortest path model, minimum spanning Tree Problem, Max-Flow problem and Min-cost problem. Project Management: Phases of project management, guidelines for network construction, CPM and PERT.

UNIT-IV Theory of Games: Rectangular games, Minimax theorem, graphical solution of 2 x n or m x 2 games, game with mixed strategies, reduction to linear programming model. Quality Systems: Elements of Queuing model, generalized poisson queing model, single server models.

UNIT-V Inventory Control: Models of inventory, operation of inventory system, quantity discount. Replacement: Replacement models: Equipments that deteriorate with time, equipments that fail with time.

ROE087                HUMAN VALUES IN MADHYASTH DARSHAN    L   T   P
3    0    0

Prerequisite:   RVE 301/401- Universal Human Values and Professional Ethics

Objectives:
1. To help students understand the basic principles of Madhyasth Darshan
2. To help students understand the existential realities including the human existence through Madhyasth Darshan
3. To help them to see the participation of human beings in the nature/existential realities (i.e. human values) and therefore the human conduct through each one of them
4. To help students apply this understanding to make their living better at different levels- individual, family, society and nature
5. To facilitate the students in applying this understanding in their profession and lead an ethical life

Catalogue Description
Madhyasth Darshan is a new emerging philosophy that describes the existential realities along with its implication in behaviour and work at the level of individual as well as society. This philosophy has been propounded by Shri A. Nagraj in seventies.

It is to be kept in mind that Darshan means realisation which calls for developing the capacity to see the reality in oneself directly. So, any study of Darshan shall help develop this capacity in the students through proper steps of practices and shall not just provide the information.

UNIT-I                Introduction to Madhyasth Darshan and its Basics
Need to study Madhyasth Darshan; introduction, basic formulations of the darshan; the complete expanse of study and the natural outcome of living according to the darshan.

UNIT-II               Submergence of Nature in Space
The ever-present existence in the form of nature submerged in space; nature classified into two categories – material and consciousness, and four orders; the form, property, natural characteristic and self-organisation of the four orders, General direction and process of evolution in the nature/existence.

UNIT-III             Human Being as an indivisible part of Nature
Human being as an indivisible part of nature; various types (five classes) of human beings; human being in the combination of self and body; purpose of self as realization, prosperity for the body; need of behavior and work for attaining the goals of realization and prosperity.

UNIT-IV               Fulfillment of human goal of realization and prosperity
Following natural, social and psychological principles for actualizing the human goal; Form of conducive society and order for such practices, study process- achieving realization through self-study and practice while living in such a society (social order).

UNIT-V                Human Conduct based on Madhyasth Darshan
Description of such a realized self, continuity of happiness, peace, satisfaction and bliss through realization, conduct of a realized human being. Possibility of finding solutions to present day problems (such as inequality of rich and poor, man and woman etc.) in the light of it.

Mode of Evaluation:
Assignment/ Seminar/ Continuous Assessment Test/ Semester End Exam
Pre-requisites- for this subject only those faculty will teach these courses who had done the FDP for these courses.

Course Objectives:
1. To help the students to understand the importance and types of relationship with expressions.
2. To develop the competence to think about the conceptual framework of undivided society as well as universal human order.
3. To help the students to develop the exposure for transition from current state to the undivided society and universal human order.

Course Methodology:
1. The methodology of this course is explorational and thus universally adaptable. It involves a systematic and rational study of the human being vis-à-vis the rest of existence.
2. It is free from any dogma or set of do’s and don'ts related to values.
3. It is a process of self-investigation and self-exploration, and not of giving sermons. Whatever is found as truth or reality is stated as a proposal and the students are facilitated and encouraged to verify it in their own right, based on their Natural Acceptance and subsequent Experiential Validation.
4. This process of self-exploration takes the form of a dialogue between the teacher and the students to begin with, and then to continue within the student leading to continuous self-evolution.
5. This self-exploration also enables them to critically evaluate their pre-conditionings and present beliefs.

Introduction to the course: Basic aspiration of a Human Being and program for its fulfillment, Need for family and relationship for a Human Being, Human-human relationship and role of behavior in its fulfillment, Human-rest of Nature relationship and role of work in its fulfillment, Comprehensive Human Goal, Need for Undivided Society, Need for Universal Human Order, an appraisal of the Current State, Appraisal of Efforts in this Direction in Human History.

UNIT-I
Understanding Human-Human Relationship & its fulfillment: Recognition of Human-Human Relationship, Recognition of feelings in relationship, Established Values and Expressed Values in Relationship, interrelatedness of feelings and their fulfillment, Expression of feelings, Types of relationship and their purpose, mutual evaluation in relationship, Meaning of justice in relationship, Justice leading to culture, civilization and Human Conduct.

UNIT-II
Justice from family to world family order: Undivided Society as continuity and expanse of Justice in behavior – family to world family order, continuity of culture and civilization, Universal Order on the basis of Undivided Society, Conceptual Framework for Universal human order, Universal Human Order as continuity and expanse of order in living: from family order to world family order, a conceptual framework for universal human order.
UNIT-IV  
Program for Ensuring Undivided Society and Universal Human Order:

UNIT-V  
Human Tradition: Scope and Steps of Universal Human Order, Human Tradition (Ex. Family order to world family order), Steps for transition from the current state, Possibilities of participation of students in this direction, Present efforts in this direction, Sum up.
